Toho Gas Group's Value Creation Materiality

Toho Gas Group has specified key issues evaluated for both their economic and social value as materiality.

- Materiality Identification Process

Taking as a reference the GRI Standards^{*}, which are the international standards for sustainability information disclosure, we extracted individual issues based on the expectations of stakeholders in line with the consideration of the Toho Gas Group Vision. The issues were evaluated from the viewpoints of economic and social value, and, after exchanging opinions with the relevant agencies, the materiality was selected through the Management Committee and the Board of Directors. * Standards for sustainability information disclosure published by the Global Reporting Initiative (GRI), an international NGO

Extraction of individual issues

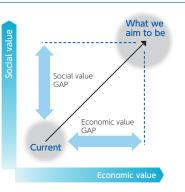

Based on the details of considerations in the process of formulating the Group Vision, items for evaluation by ESG evaluation agencies, and expectations from stakeholders, the potential individual issues were brought up and, following interviews with each department, 30 individual issues were extracted.

Organization and evaluation of extracted individual issues

The prospective materiality was investigated in a workshop based on the individual issues extracted in STEP 1. Based on

the viewpoints of both economic and social value, the individual issues were mapped out toward the realization of a sustainable society and the Group Vision. Issues with common factors were grouped together.

2

Identify Materiality

Discussions were held about the groups formed in STEP 2, and a draft materiality was organized. The materiality was selected through the Management Committee and the Board of Directors.

The challenges and goals for efforts toward the materiality were brought in line with the Medium-Term Management Plan 2022-2025.

Materiality	Action Issues
Promote carbon neutrality	 Reductions of carbon and decarbonization at gas customer locations Contribute to the reduction in CO₂ emissions from society as a whole
	 Develop technologies to decarbonize gas itself
	 Establish a foundation to expand the use of hydrogen
	Low-carbonize/decarbonize electricity
Provide various kinds of energy and services	Development into a Total Energy Provider
	 Expansion of domestic and overseas energy-related business
	 Provide value through services that enrich life and services that support business
Supply safe, secure and stable energy	 Advancing security measures and disaster measures
	• Stable procurement at a reasonable price
Contribute to the region through the resolution of social issues	 Strengthen initiatives for coexistence with local communities
VI V Aller 12 mmm 13 mm 14 mmm 15 mm 17 mmm	 Promotion of CSR procurement
©	Promoting resource recycling
	Biodiversity conservation
Improve work satisfaction and ease of work and	 Human resource management
promote diversity	Diversity and inclusion

	 Safety and health management
Strengthen compliance and governance	 Promote risk management and strengthen information security
	• Compliance promotion

Target (FY2025)	FY2022 Results	Main related pages
Amount of contribution to CO ₂ reduction 1 million tonnes Reduction of CO ₂ emission intensity in business activities -2% CO ₂ emission intensity/year	 Amount of contribution to CO₂ reduction 307 thousand tonnes CO₂ emission intensity in business activities +3.4% CO₂ emission intensity compared to the previous year 	P.25 Initiatives for Carbon Neutrality P.35 Management of Environmental Preservation P.39 Global Warming Countermeasures P.80 Electricity Business
Promote development and verification of technology for CO ₂ capture and utilization and methanation	 Signed an agreement with the city of Chita for small-scale methanation Launched in-depth examination concerning the introduction of e-methane to Japan using the Cameron LNG base in the U.S.A. 	P.25 Initiatives for Carbon Neutrality
 Began construction of hydrogen production facilities at the Chita-Midorihama Works Launched sales of industrial furnace burners capable of switching between city gas and hydrogen combustion 		P.25 Initiatives for Carbon Neutrality P.77 Technical and Product Development
Amount handled of renewable energy power sources 250,000 kW*1	 Amount handled of renewable energy power sources 93,000 kW 	P.25 Initiatives for Carbon Neutrality P.80 Electricity Business
Numbers of city gas, LPG, and electricity customers 3 million* ²	• Number of energy customers reached 2.92 million (city gas: 1.74 million, LPG: 0.60 million, electricity: 0.58 million)	P.71 City Gas Business P.79 LPG and Other Energies P.80 Electricity Business
	 Participated in industrial-use natural gas sales business in Southeast Asia (Thailand, Vietnam) 	P.81 Business Development
Digital contact membership 1.3 million New service launches About 10 services a year	 Digital contact membership 0.90 million New service launches 11 services a year 	P.71 City Gas Business P.81 Business Development
Maintain zero serious accidents Advancing Security Measures and Disaster Measures	 Zero serious accidents Advanced measures against aging (LNG plant control system updates, aging pipeline countermeasures) 	P.71 City Gas Business
Diversify procurement sources	 Configured a LNG procurement portfolio resilient to environmental changes Decision to implement system-connected batteries to contribute to stable power supply 	P.71 City Gas Business P.80 Electricity Business
Strengthen efforts for coexistence with local communities to solve social issues and improve resilience	efforts for coexistence with local communities orial issues and improve resilience Established three now regional Shin-denryoku companies in collaboration with municipalities and other entities	
• School-education support activities (special classes at schools, Toho Gas Energy Exhibition Hall), hosted EPOC • School-education support activities (special classes at schools, Toho Gas Energy Exhibition Hall), hosted EPOC • or the next generation in collaboration of the next generation of the next gener		P.45 Contribution to the Local Communities
Promote confirmation of procurement status and CSR procurement in collaboration with related parties	Developed and published CSR procurement policy and guidelines Maintained our partnership-building declaration	P.55 Initiatives for Respect of Human Rights
Recycling rate of waste generated after gas pipeline construction: 99% or more	 99.7% recycling rate for waste materials generated by gas pipeline construction 	P.41 Resource Recycling
Sustenance and recovery of biodiversity through business activities and regional contribution activities, satoyama and forest conservation, and contribution to protection of local species	 Maintained and managed biotopes, implemented satoyama and forest conservation activities in collaboration with municipalities Recognized as a certified enterprise under Aichi Biodiversity Company Certification Program 	P.43 Biodiversity Conservation
 Improve employee engagement Ensure diversity in appointing managers 	 Began management training for all managers Conducted external-speaker seminars (Toho Meetup) for young employees 	P.49 Promotion of Personnel Policies
	 Ratio of women in management positions: 3.4% (26 persons), Gender pay gap: 73.3%, Ratio of mid-career hires: 25.5% (28 persons), Ratio of employment of people with disabilities: 2.40% Expanded programs to support compatibility with child-rearing and caregiving 	P.49 Promotion of Personnel Policies
	Recognized as a "Certified Health & Productivity Management Outstanding Organization 2023 (White 500)" for the fourth consecutive year	P.53 Initiatives for Occupational Health and Safety
 Share and raise awareness about compliance and risk detection in the entire organization 	 Conducted training presuming anticipating the occurrence of a cyber-attack against core systems Held workplace meetings focused on close-at-hand job-related risks 	P.61 Internal Control P.63 Compliance
	 Enacted measures relating to compliance with the Act on Prohibition of Private Monopolization and Maintenance of Fair Trade Augmented education through periodic streaming and library archiving of compliance training videos Established and promoted the utilization of consultation services based on the amended Whistleblower Protection Act 	P.63 Compliance

*1 The target amount handled of renewable energy power sources by 2030 is 500,000 kW. The amount handled of renewable energy power sources includes power development, ownership, FIT sources, and procurement both domestically and overseas. *2 Total number of customer accounts of City Gas, LPG, and Electricity * Annual disclosure of actual results based on the Board of Directors' report is planned
