Toho Gas Co., Ltd.

A Smart Town “minato AQULS” Certificated as “Carbon Neutral Leading Area” by Ministry of the Environment

The proposition of “Carbon neutral compact city model to be realized at redevelopment area” at “minato AQULS” jointly proposed by Toho Gas Co., Ltd. (President: Nobuyuki, Masuda) and Nagoya-city was officially certificated as “Carbon neutral leading area (The 1st term)” by Ministry of the Environment.

Carbon neutral leading area refers to the area which aims to realize net-zero CO2 emission for electricity consumption in the consumer sector by 2030 towards 2050 Carbon Neutral Declaration.

In “minato AQULS” area, Toho Gas will accelerate its effort together with Nagoya city to make a model of promoting regional decarbonization which contributes to resolving the regional issues, providing higher quality of life and enhancing the attractiveness of the area while tackling carbon neutrality by introducing renewable energy utmost and advanced technology.

Toho Gas will contribute to the realization of sustainable society through “Promotion of Carbon Neutrality” set forth in its Medium Term Management Plan.
